

# AFTERTREATMENT COMPONENTS

## WHEN EMISSIONS GO UP AND TRUCKS ARE DOWN, DAYTON IS BY YOUR SIDE

Emissions systems are serious business, and the costs associated with maintaining these systems can be extreme. One way to help manage these costs is by selecting emissions systems components from Dayton Parts, the aftermarket leader in coverage and quality. From the EGR cooler all the way down the exhaust stream path to the SCR and beyond, we provide high-quality alternatives to OEM parts that are priced competitively.

You can minimize your fleet's downtime, too. Our distribution is second-to-none, meaning the parts you need are on shelves, ready to get idle trucks back into service. Emissions system repair also cost you when your trucks aren't on the road earning. Choose Dayton Parts for a new level of repair access and speed.

**1,837%**

**Increase in emissions  
repair costs since 2010**
