

DAYTON

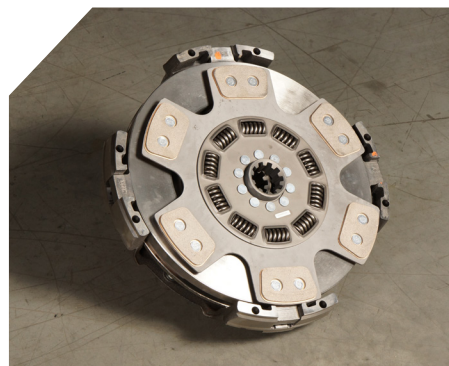

# CLUTCH COMPONENTS

## MAKE THE SHIFT

When it comes to ensuring maximum uptime for Class 8 trucks, Dayton clutch components stand out as the top choice. Our clutch friction products offer superior durability and reliability even under the most demanding conditions. Dayton clutches withstand high torque and heavy loads without compromise.

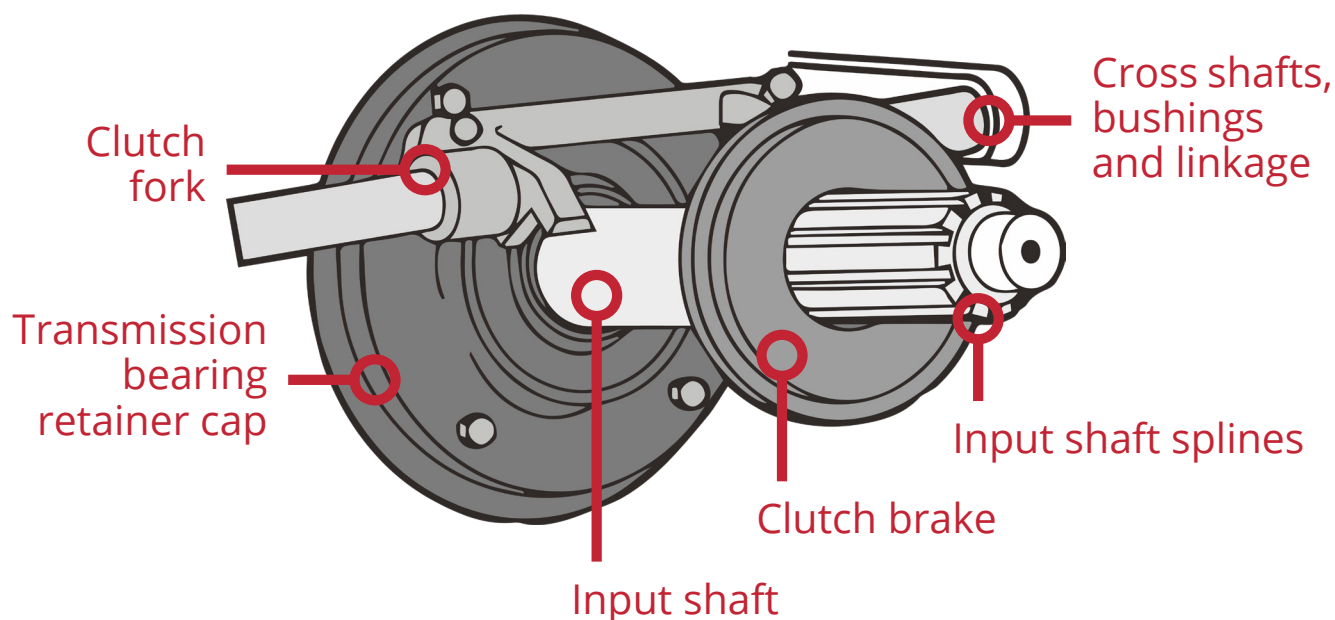

But a complete clutch service is much more than a simple friction disc.

Our cast of supporting components help ensure smooth clutch operation, because the clutch is a system, not just a part. By choosing Dayton for clutch components, you're unlocking access to all the other parts in the system that need attention when the friction parts need replacement. Your techs want to do the job right—invest in parts with a proven track record of quality and longevity. Ensure your fleet operates at peak efficiency and minimizes downtime—trust our brand to keep your trucks performing at their best, mile after mile.

## PERFORM A COMPLETE CLUTCH INSTALLATION

Inspect and replace these components for maximum economy and reliability.

Additional driveline components are available for complete and reliable repairs.
