

DAYTON HEAVY-DUTY

POWER STEERING PUMPS

THE MOST RELIABLE QUALITY FROM THE MOST TRUSTWORTHY BRAND.

The power steering pump on a Class 7 or Class 8 heavy-duty truck is a critical component of the power steering system. So when you need to make the best replacement choice, choose Dayton.

Dayton HD power steering pumps are all-new construction, with design upgrades engineered to help eliminate the most common failure points of lesser aftermarket replacement pumps. They're built to last, with bearings that include superior lubricants, along with stringent manufacturing standards that demand tight tolerances and proper heat treatment. Our pump seals are engineered from premium materials designed to far outlast the seals used in inferior designs. And every single pump is tested for quality and performance and assigned a serial number before it leaves our global manufacturing facilities.

Don't settle for a remanufactured power steering pump or one from a no-name brand with questionable after-sales support. Count on Dayton to deliver OEM-benchmarked performance and hassle-free, direct-replacement units at prices that fit fleet and owner-operator budgets.

Comprehensive coverage – coverage for many of the most popular Class 7 and Class 8 trucks on the road

Rigorously tested – every power steering pump is quality tested and serialized

All-new construction, not remanufactured – eliminate the hassles of core charges and the inconsistent quality of lesser brands

Improved designs – Dayton HD power steering pumps feature upgraded bearings and seals designed to eliminate common pump failure points, like metal shavings entering the steering fluid that can cause the pump to seize
